Non fail-safe actuators for ventilation applications

Edition 2022

BELIMO®

Rotary actuators non fail-safe

Actuator type	Nominal torque ¹⁾	Shaft diameter	Damper size up to approx.	Page
Rotary actuators with connector plug				14
UM..		1 Nm	6...12.7 mm	■ 0.2 m ²
Rotary actuators with connecting cable				15-16
CM..		2 Nm	6...12.7 mm	■ 0.4 m ²
LM..A.. + VLM..A..		5 Nm	6...20 mm	■ 1 m ²
NM..A..+ VNM..A..		10 Nm	8...26.7 mm	■ 2 m ²
SM..A..+ VSM..A..		20 Nm	10...20 mm	■ 4 m ²
GM..A..+ VGM..A..		40 Nm	12...26.7 mm	■ 8 m ²
Rotary actuators with connecting terminals				17-18
CM..		2 Nm	6...12.7 mm	■ 0.4 m ²
LM..A..		5 Nm	6...20 mm	■ 1 m ²
NM..A..		10 Nm	8...26.7 mm	■ 2 m ²
SM..A..		20 Nm	10...20 mm	■ 4 m ²
GM..A..		40 Nm	12...26.7 mm	■ 8 m ²

Use of damper actuators from BELIMO: the actuators listed in this documentation are designed for adjusting dampers in technical building installations.

¹⁾ When calculating the torque or actuating force required to operate air dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, place of installation and air flow conditions. The recommended damper sizes are guidelines.

Linear actuators non fail-safe

Actuator type	Actuating force	Stroke range	Damper size up to approx. ¹⁾	Page
Linear actuators with connector plug				19
UH..		50 N	0...60 mm	■ 0.2 m ²
Linear actuators with connecting cable/connecting terminals				19–20
CH..		125 N	0...100 mm	■ 0.8 m ²
LH.A..		150 N	0...300 mm	■ 1 m ²
SH.A..		450 N	0...300 mm	■ 3 m ²

Use of damper actuators from BELIMO: the actuators listed in this documentation are designed for adjusting dampers in technical building installations.

¹⁾ When calculating the torque or actuating force required to operate air dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, place of installation and air flow conditions. The recommended damper sizes are guidelines.

Special actuators non fail-safe

Use of damper actuators from BELIMO: the actuators listed in this documentation are designed for adjusting dampers in technical building installations.

¹⁾ When calculating the torque or actuating force required to operate air dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, place of installation and air flow conditions. The recommended damper sizes are guidelines.

²⁾ Control, operating range, feedback, running time and other functions with MP types adjustable with PC-Tool or Service Tool ZTH EU.

³⁾ Running time and other functions are adjustable with PC-Tool or Service Tool ZTH EU.

Bus solutions from Belimo, save costs and energy!

Bus systems can be used to exchange any volume of data from various bus participants over the same physical lines. The user has unrestricted access to control, feedback and parameters on the individual devices. Cabling expenditures are reduced by up to 90% compared with actuators with conventional wiring.

Thanks to time and material savings (cables, connecting terminals, connectors, etc.), installation work is simpler and cheaper. Further positive selling points for bus solutions include their lower fire load and the fact that they take up less space in cable trays and switch cabinets. Depending on the application and requirements, different bus systems are used.

One or two sensors can also be connected to most communicative actuators. This may be a passive resistance sensor (Pt1000, Ni1000, NTC etc.), an active sensor (e.g. with a 0...10 V output) or a switching contact. Its signals are digitised in the Belimo actuator and transferred to the higher-level bus system.

The Belimo MP-Bus was specially developed as a master-slave system for HVAC actuators and sensors. It allows up to eight different HVAC performance devices to be grouped together and connected to any higher-level system. It is very resistant to external interferences and does not need bus terminals.

Modbus is a communication protocol, which has become the de-facto standard. It is used commonly all around the globe and in a huge range of applications. Its simple implementation makes Modbus very popular with many manufacturers.

BACnet is a proven, widely used communication protocol for building automation. The standard is open, requires no licence and is used by a large number of international providers, universities and associations. Implementing the BACnet Standard Device Profiles and the associated BACnet Interoperability Building Blocks guarantees genuine compatibility between various BACnet devices.

KNX is a well-engineered building automation system used around the world to control systems spanning several maintenance groups, for example heaters, blinds and security technology in buildings. The KNX-certified actuators enable direct connection to the KNX network. Communication takes place via the integrated KNX interface (TP, S-Mode).

IoT actuators with Ethernet interface can exchange operating and setting data with Belimo Cloud. It is controlled locally via an analogue signal or BACnet/Modbus. Thanks to the open client API of the Belimo Cloud, a connection to a specific cloud solution can be implemented.

Parametrisable rotary actuators with connecting terminals

Nominal torque	5 Nm	10 Nm	20 Nm	40 Nm
Damper size up to approx.	1 m ²	2 m ²	4 m ²	8 m ²
Nominal voltage	LM..A-TP	NM..A-TP	SM..A-TP	GM..A-TP
Communicative¹⁾, parametrisable²⁾				
AC/DC 24 V	LM24A-MP-TP	NM24A-MP-TP	SM24A-MP-TP	GM24A-MP-TP
Technical data				
Shaft diameter	6...20 mm	8...26.7 mm	10...20 mm	12...26.7 mm
Sound power level	≤35 dB(A) @ 150 s	≤35 dB(A) @ 150 s	≤45 dB(A) @ 150 s	≤45 dB(A) @ 150 s
Running time motor 90°	150 s			
Manual override	Gear disengagement with push button, can be locked			
Connection	Connecting terminals			
Direction of rotation	Selectable with switch			
Angle of rotation	Max. 95°, can be limited on both sides by adjustable mechanical end stops			
Position indication	Mechanical, add-on			
Degree of protection	IP54			
Ambient temperature	-30...50°C			
Storage temperature	-40...80°C			
Ambient humidity	95% RH, non-condensing			
EMC	CE according to 2014/30/EU			

¹⁾ You can find suitable system diagrams at www.belimo.com.

²⁾ Control, operating range, feedback, running time and other functions with MP types adjustable with PC-Tool or Service Tool ZTH EU.
Other versions on request.

Configuration options

Some actuator product ranges permit adaptation to special customer preferences. These allow - on the basis of existing components - a selection of different cable lengths, mechanical interfaces, running times and operating ranges.

Please get in touch with your local Belimo contact person.

Example

LM..A..

All inclusive.

Belimo as a global market leader develops innovative solutions for the controlling of heating, ventilation and air-conditioning systems. Actuators, valves and sensors represent our core business.

Always focusing on customer added value, we deliver more than only products. We offer you the complete product range for the regulation and control of HVAC systems from a single source. At the same time, we rely on tested Swiss quality with a five-year warranty. Our worldwide representatives in over 80 countries guarantee short delivery times and comprehensive support through the entire product life. Belimo does indeed include everything.

The "small" Belimo devices have a big impact on comfort, energy efficiency, safety, installation and maintenance.

In short: Small devices, big impact.

5-year warranty

On site around the globe

Complete product range

Tested quality

Short delivery times

Comprehensive support
